

Parish of St. Helier
Carbon Neutral Working Group
Workshop 1

1st May 2019, 6pm, Assembly Room, Town Hall,

Objective:

The objective of workshop 1 is to identify and gain consensus around the main issues affecting the carbon footprint of the Parish and to identify initial thoughts on possible solutions.

Workshop

The workshop will provide an opportunity to identify and discuss:

- a. the main issues impacting the carbon foot print of the Parish, including that generated by Parish activities as well as the Parish as a whole
- b. some initial thoughts on potential ways of reducing the carbon footprint
- c. to group issues and possible actions into main categories
- d. to identify areas where the group wishes to receive presentations from those with specific knowledge and/or experience on particular matters.

By the end of the workshop 1, it is hoped that the Working Group will have identified sufficient information to enable more detailed discussions around Parish Services and reductions to their carbon footprint to take place at Workshop 2 and then similar discussions on the Parish as a whole at workshop 3.
